

Split Flange Coupling Learning System

95-PAS2

Split Flange Coupling Learning System (95-PAS2)

Interactive Multimedia Curriculum and Student Reference Guide

Learning Topics:

- Split Flange Coupling Function
- Operation
- Manufacturing Specification
- Installation
- Troubleshooting Installation Problems

The 95-PAS2 Split Flange Coupling Learning System teaches learners how to identify, select, install and troubleshoot a split flange coupling. Incorrect assembly of a split flange coupling can lead to product failure, code compliance issues, and safety problems. Amatrol's Split Flange Coupling Learning System equips learners with the knowledge to select and use split flange coupling correctly, as well as teaching them the hands-on skills needed to work well with these types of connections.

Adding to the Production Assembly Learning System (950-PAS1) to teach split flange coupling and identification, the model 95-PAS2 includes three hoses of different lengths (44 1/2-in, 45 3/4-in, 93 9/16-in), eight split flanges, web-based student learning materials for both theory and lab, and a teacher's assessment guide. The web-based curriculum includes virtual simulation of key skills, allowing learners to practice skills in advance of actually working on the equipment. This system uses industrial-quality components to help assure that students are better prepared for what they will encounter on the job and to withstand frequent student use.

Technical Data

Complete technical specifications available upon request.

Hoses of Varying Length (3)

- 44-1/2 in
- 45-3/4 in
- 93-9/16 in

Split Flanges (8)

- Interactive Multimedia Curriculum (N19036)
- Instructor's Guide (C19036)
- Installation Guide (D19036)
- Student Reference Guide (H19705)

Additional Requirements:

- Adds to Production Assembly Learning System (950-PAS1)
- Requires PC, see amatrol.com/support for PC requirements
