# KEEP TRACK OF RESULTS WITH SIMULATION MANAGER
A Secure Database for all Simlog Personal Simulators

Simulation Manager brings added security and efficiency to your Simlog Simulator training program

- Step 1: Install Simulation Manager and any Simlog Personal Simulator

- Step 2: Create classes and user accounts with unique login names and passwords

- Step 3: Launch your Personal Simulator in Multi-User Mode

- Step 4: Track Simulation Results in the Simlog database

Alone, Simlog's Personal Simulators carefully measure the quality and productivity of your trainees' simulated work, but results are only saved on the local PC as files.

Adding Simulation Manager provides security and efficiency when you have many Personal Simulator users, and everyone's simulation results are automatically stored into the same Simlog database. The results files may be reviewed not only within Simulation Manager but with an included external Viewer that allows you to share Simulation Results with remote locations.

Only 1 Simulation Manager is needed as long as all your Personal Simulators are on the same PC or on networked PCs.
